

itSeez3D Launches the First 3D Scanning App for Intel® RealSense™ 3D Camera R200

New itSeez3D application transforms tablets powered with Intel® RealSense™ Camera R200 into powerful and easy-to-use mobile 3D scanners

SAN JOSE, Calif. – December 8, 2015 – itSeez3D, a leading developer of mobile scanning solution, announced today the official release of its 3d scanning application for tablets powered with Intel® RealSense™ 3D camera. Using the world facing Intel® RealSense™ long range camera R200 for depth and color capture, itSeez3D allows to create photorealistic scans of people to share via social media or print on a 3D printer.

itSeez3D is the first 3D scanning application for Intel® RealSense™ Camera R200 featured at Intel® RealSense™ App Showcase. Similar to the iOS version, the new itSeez3D app for Windows tablets with R200 camera allows to make a 3D portrait or full-body 3D model of a person simply by walking around it. You can then preview the model on a tablet and save it for further viewing, editing, as well as share on Facebook with your friends or order a 3D printed figurine.

“More and more devices are now able to “see” in 3D, and we’re very excited to leverage this world-changing technology to make 3D scanning affordable and easy for everyone”, said Victor Erukhimov, CEO of Itseez3D. “3D scanning creates endless opportunities both for businesses and individuals and we can’t wait to see people using itSeez3D app on mobile devices enabled with Intel® RealSense™ technology”.

Users can already try 3D scanning on the new [HP Spectre x2](http://www.intel.com/content/www/us/en/architecture-and-technology/realsense-devices.html) touch-screen laptop. See more upcoming devices with R200 camera at <http://www.intel.com/content/www/us/en/architecture-and-technology/realsense-devices.html>.

itSeez3D app is available for download for free at the [Intel® RealSense™ App Showcase](#). The app currently works with Microsoft® Windows™ 8.1 or 10, other platforms are under development. The current version of the app is available in two languages -- English and Japanese.

About itSeez3D

itSeez3D is a spin-off company of Itseez, a computer vision company that has been enabling devices to see the world since 2007. itSeez3D develops high quality 3D scanning technology that can be used by both professionals and consumers. The company released its first scanning application for iPad and Structure Sensor in 2014, which has become a leading scanner solution in its class.
